

Liquiline CM442

1-/2-Channel Liquid Analysis Transmitter

▲ **Clever simplicity:** One controller for all parameters and applications, intuitive user interface, automatic sensor recognition, hot plug & play with pre-calibrated Memosens sensors.

▲ **High flexibility:** Universal modules for all parameters minimize spare part stock and allow for easy extension to up to 8 channels at any time.

Digital Multiparameter transmitter for controlling,
pH/ORP, conductivity, turbidity
oxygen(DO), chlorine, SAC, nitrate,
ammonia.

IP 67

Process temperature -20...60°C

Output

- 2...4x 0/4...20 mA current outputs
- Alarm relay
- 2x relay

Input 1...2x Memosens digital input
