Electronic differential pressure measurement for level

- ❖ Electronic differential pressure measurement:
2 sensors , 1 transmitter, 1 signal output to control system
- ❖ Multivariable level measurement:
HART-based differential pressure, head pressure and sensor temperatures from one system
- ❖ Continuous system health indication via HART®-based diagnostics
- ❖ Eliminate tubing and connection leaks often seen with traditional systems
- ❖ No system recalibration or reconfiguration required with any component change
- ❖ Watertight, quick disconnection between sensors
