Oil Leak Detector NAR300 System

- ❖ Twin detection principle:
 - Conductive sensor detects presence of conductive liquid
 - Vibration sensor determines presence of oil or water
- ❖ No moving parts, low maintenance, long life
- ❖ Safe operation assured via advanced diagnostics that detect failed circuit connection, frozen pit-water, etc.
- ❖ Improved performance even in harsh pit conditions

Vibration sensor Conductivity sensor

*Advanced
technology oil leak
detection for use in
depot, refinery,
power plants etc. for
environment
protection.*
